

Your roof is failing right now. Just slowly.

Los Angeles gets twelve inches of rain a year — and **three hundred days of sun**. Roofs here don't wear out from water. They wear out from heat, light and time, every single day, whether it rains or not. We come out twice a year and stay ahead of it.

WHAT ACTUALLY GOES WRONG ON A LOS ANGELES ROOF

01

The sun, not the storm

Your roof heats and cools every day of the year. Sealant dries and cracks. Shingles go brittle and shed granules. Nothing about that waits for rain — and by the time water finds the gap, the damage is already years old.

02

Tile lasts. The felt underneath doesn't.

Clay and concrete tile can last a century. The underlayment beneath it — the layer actually keeping water out — lasts twenty to twenty-five years, and burns through faster anywhere a slipped tile lets sunlight reach it.

03

Embers land in the gutters

In a fire hazard zone, your attic and soffit vents have to be fire-rated and State Fire Marshal listed. Those screens clog and tear. Debris collects in valleys and gutters. That's where embers land.

THE PLANS

PLAN	VISITS PER YEAR	UP TO 2,000 SQ FT	2,001–3,500	3,501–5,000
Essential Inspection, report, clear & seal	One — before the rains	\$349	\$419	\$489
Complete Most popular. Adds storm response.	Two — before and after	\$699	\$799	\$949
Complete Plus For tile and hillside homes	Two, plus aerial survey	\$849	\$999	\$1,149

Per year. Month to month — cancel any time. Homes over 5,000 sq ft quoted individually.

NOTHING UP FRONT

You pay after each visit, not before. There is no deposit, no annual fee taken in advance, and nothing to cancel out of if you change your mind. California law is strict about a contractor collecting for work it hasn't done yet — so we don't.

Get on the calendar before the first rain.

The Roof Care Plan is a maintenance agreement. It is not insurance, not a warranty, and not a guarantee against leaks. Repairs found during a visit are quoted separately at a member discount. Full terms in the service agreement.

TWO VISITS, TIMED TO THE SEASON

September & October

BEFORE THE RAINS

Clear the valleys, roof surface and gutters. Top off sealant at every penetration and flashing. Reset any tile that's slipped. Check and photograph the fire vents. Then you have a written record of the roof going into winter.

May & June

AFTER THE RAINS

Find out what the winter actually did — and what the Santa Anas moved. Same scope, plus anything that shifted. This is the visit that catches the small failure before it spends a summer baking in the sun.

EVERY VISIT INCLUDES

- A full inspection of the roof covering, valleys, flashings, penetrations, vent boots, ridge, skylights and accessible attic ventilation
- A written photo report with a condition rating and an estimate of remaining roof life — yours to keep
- Debris cleared from the roof surface, valleys, gutters and downspouts
- Sealant topped off at penetrations and flashings, exposed fasteners sealed
- Slipped tiles reset, and any tile we break replaced at no charge
- Attic and soffit vent screens and eave closures checked and photographed for fire code
- A priced list of anything we recommend, with no obligation

AND WHAT IT DOESN'T INCLUDE — PLAINLY

This is a maintenance plan, not a repair plan. If we find something that needs fixing, we'll quote it, you decide, and you get the member discount with the service call waived.

- ☐ Roof replacement, re-roofing, and underlayment replacement or tile lift-and-relay
- ☐ Repairs beyond the resets and sealant work above
- ☐ Structural, decking or sheathing work
- ☐ Interior repairs, and storm or fire damage restoration
- ☐ Skylight, solar, chimney and gutter repair or replacement
- ☐ Coatings, tree trimming, permits and code upgrades

MEMBER BENEFITS

10–20% off every repair depending on plan · **service call fee waived** · **24-hour storm response** when everyone else is booked for two weeks · **up to 30% of what you pay builds up as credit** toward your roof when you do replace it · **transfers free to the buyer** if you sell the house, inspection history included

QUESTIONS WE GET

My roof is almost new. Why now?

Most manufacturer warranties have maintenance conditions in them, and claims get denied for missing records. Starting now builds the paper trail that protects the warranty you already paid for.

Can't I just call when it leaks?

You can, and we'll come. But water on the ceiling usually means it's been in the assembly a while — so you're paying for the roof and whatever it got into. And when it really rains here, every roofer in the city is booked out two weeks.

Am I locked in?

No. It's month to month, you can cancel any time online or by phone, and you only ever owe for visits already done.

What if you break my tile?

We replace it, at no charge to you. Tile breaks — anyone who tells you otherwise hasn't walked enough of it. We minimize foot traffic, we photograph what was already cracked before we started, and we own what we break.

We'll walk your roof and show you what's up there.
